

MOVE AWAY FROM THE GREY®

The Lean Mindset – Driving a Sustainable Business

Aspire is an innovative new consultancy that is founded on strong Lean & Operational expertise. We ensure that we work closely with our clients, and only deliver what is necessary to meet the clients' needs. Our mantra is to reduce or eliminate all "waste", whether it be process, transactional, environmental or energy. "Fat" is the unnecessary waste that the customer is not prepared to pay for. Our Principal and Founder John Cockburn-Evans is also a certified ESOS Lead Energy Assessor, and Fellow of the Institution of Chemical Engineers. He has consulted on "Operations Excellence" with multiple global clients, and coached at all levels of organisations including C-Level, Directors & VP's. John has also led OPEX transformations at smaller operating sites with 20-50 people in addition to those of 2000+ people. Everything that we do is executed so that it is totally sustainable for the client. We create a "Lean" Mindset at all levels of the organisation and offer continuous coaching to maintain this. Aspire can also execute Energy Assessments and provide sustainability plans for mid-size SME's and Corporates. John also has a wealth of experience with executing small, large and medium capital projects.

Specific Deliverable Work

- ✓ Operational Excellence Consulting founded on Lean Methodologies and waste removal.
- ✓ The design & implementation of Operational Excellence systems
- ✓ Training on Lean Tools & Principles
- ✓ Continuous Improvement Events & Problem Solving
- ✓ Detailed Energy Assessments & Execution. Licensed to frame, scope, deliver and approve Energy Assessments under the government ESOS Scheme for large SME's
